

## Town of Apex Electric Heat Pump and Electric Water Heater Rebate Program

- Does your older heating system or water heater need to be replaced?
- Are you interested in upgrading your existing units to a more energy efficient model?
- Do you like saving money and helping the environment?
- If so, the Town of Apex can help!

The Town offers two rebate programs to assist customers in upgrading their heating systems and water heaters. Upgrading older appliances is a wise choice for your home, for your pocket book and the environment.

### **Electric Heat Pump Program (Electric Heat Strips)\***

- \$300 rebate available for new all electric heat pumps with electric heat strips
- Available for new electric heat pump with electric heat strip installations
- Also available for replacement of older, less-efficient heat pumps, gas furnaces and oil furnaces when a new electric heat pump with electric heat strips is installed.
- Unit must have load management switch installed with at least 25% control on the air conditioning cycle and electric heat strip control.
- Dual fuel systems do not qualify
- Heat Pump must be all electric to qualify

### **Electric Water Heater Program\***

- \$100 rebate available for new all electric water heaters.
- Available for installation of new electric water heater units
- Available for replacement of older gas or electric water heaters when a new electric water heater is installed.
- Unit must have a load management switch installed
- Unit must be a quick recovery design with a minimum 40 gallon capacity.
- Tank-less water heaters do not qualify

For more information about the electric heat pump and electric water heater rebates, contact Emily Woody with Electric Utilities at 249-3531.

Offer only available to Town of Apex Electric residential customers. Program may be amended or terminated at any time at the discretion of the Town.

Why are we doing this? This is a way the Town can give back to its citizens/customers and promote ecological and economic uses of electricity in a way that lowers our demand costs. Our goal is to offer the best possible rates, relationships, and reliability to all of our customers all day every day.

*\*By receiving the rebate, customer agrees to participate in the Load Management Program for a minimum of 5 years.*
